

INVITATION

For the Presentation of BOKU-VIBT Imaging Center

Date: Monday, 6.12.2010 at 17:00 pm

Place: BOKU Festsaal, Gregor Mendel-Str. 33

Speaker: Dr Monika Debreczeny

Topic: The BOKU-VIBT imaging center opens its doors: a good start for the future

Current fluorescence microscopic techniques are very well represented in the new core facility of the university. The lecture gives an overview about the various machines, confocal, epi-fluorescence, Total Internal Reflection Fluorescence (TIRF) and laser microdissection microscopes, about their mode of operation, possible applications and perspectives for future developments. Everybody, without the least knowledge in physics is welcome to attend the lecture.
