

Guest Lecture Announcement

Professor Graeme Hammer

Director of the Centre for Plant Science (CPS)
University of Queensland, Australia

will give a lecture

Crop ecophysiology and modelling to aid molecular breeding for complex adaptive traits

Date: 10th April (Wednesday), 10:00 a.m.

Venue: Vortragssaal, IFA-Tulln

Graeme is a Professor in Crop Science and Director of the Centre for Plant Science (CPS) in the Queensland Alliance for Agriculture and Food Innovation (QAAFI), which is a research institute of The University of Queensland, Australia.

Graeme conducts research on the physiology and genetics of complex adaptive traits in field crops with a focus on water productivity in cereals. His research underpins the development of mathematical models of crop growth, development and yield that enable simulation of consequences of genetic and management manipulation of crops in specific target environments. He has played a leading role in the design and on-going development of the APSIM crop modelling platform, which is now used world-wide.

Everybody is cordially welcome
