

St. Anna Kinderkrebsforschung
CHILDREN'S CANCER RESEARCH INSTITUTE

Molecular Biology Postdoctoral Position

The Children's Cancer Research Institute (CCRI) of St. Anna Kinderkrebsforschung association in Vienna offers a Molecular Biology Postdoctoral position in studying transcription factor / microRNA networks in Ewing's sarcoma.

The applicants will be part of a multidisciplinary cooperative European systems biology project. The position offers excellent scientific opportunities for cross training in leading-edge experimental, quantitative and bioinformatics methods in a highly stimulating and diverse environment.

The CCRI offers excellent laboratory space and access to state-of-the-art analytical tools in close proximity to and interaction with the clinics of St. Anna Kinderspital. Additional information regarding the CCRI can be found at <http://www.ccri.at>.

The ideal candidate should have a PhD and/or MD degree with a strong background in Molecular Biology or related field with significant research experience in RNA and protein analysis and the study of high-throughput biological data demonstrated by first or senior author publications in peer reviewed journals. Experience in microRNA research is desirable but not required.

Vienna is an exciting place to live by offering very broad and dynamic cultural programs, excellent social standards and quality of living.

Interested candidates may submit a CV and three letters of reference along with a cover letter stating your reasons for applying to:

Dr. Heinrich Kovar, Assoc. Prof., Scientific Director
heinrich.kovar@ccri.at

Review of applications will begin December 1st, 2010 and continue until the position is filled.
