

## The University of Natural Resources and Life Sciences, Vienna (BOKU)

is inviting applications for the position of a Full Professor in

## **Botany and Vegetation Ecology**

The University of Natural Resources and Life Sciences, Vienna (BOKU), Department of Integrative Biology and Biodiversity Research, seeks to appoint a Full Professor of *"Botany and Vegetation Ecology"* with 1st October 2022. The position is offered in accordance with §98 of the 2002 Universities Act in the form of an ongoing contract.

The University of Natural Resources and Life Sciences, Vienna, the "Alma Mater Viridis", is the University of Sustainability and Life Sciences. It is BOKU's task to make a key contribution to the conservation and protection of resources for future generations through its wide variety of expertise. Combining natural sciences, engineering as well as social and economic sciences, its aim is to increase knowledge of the ecologically and economically sustainable use of natural resources. With 11,000 students and about 2,900 employees, BOKU is one of Europe's leading life science universities.

The Department of Integrative Biology and Biodiversity Research comprises the Institutes of Botany, Wildlife Biology and Game Management, Zoology, Integrative Nature Conservation Research, and Mathematics. Research focus of the department is on the analysis of plants and animals and their environment, from the level of organisms to ecosystems, and their importance for society. The strategic aims are the integration of basic research with applied research to manage natural resources in a sustainable manner. The expected teaching will cover basic biology topics as well as advanced courses within the research fields of the bachelor and master programs. The infrastructure at the Institute of Botany, where the professorship is affiliated, includes a botanical garden, herbarium, genetic laboratory and a gene bank.

The applicant should be qualified in plant biodiversity with experiences in research and teaching. The focus in research should be vegetation research, population biology, systematics, or related subjects. Collaborations within and outside the department as well as with stake holders are expected to ensure a conservation of a biodiverse or sustainable landscape. Teaching involves courses in German and English language. The position covers the responsibility as head of the botanical garden.

## Job specifications

- Venia docendi or foreign equivalent or an equivalent subject-relevant academic qualification.
- Relevant experience and competence in teaching, guidance in scientific work, as well as the supervision of junior scientists (PhD students). The candidate is expected to submit a teaching portfolio.
- Sound international research experience.
- Teaching in German and English.
- Excellent publication achievements in the scientific field.
- Subject-specific research experience of national and international reputation, as well as ability to network.
- Experience in the successful acquisition, execution and management of research projects.
- Cooperation with national and international research institutions and with relevant partners from public services and business.
- Management and interpersonal skills including gender and diversity management skills, communication and team skills.
- Willingness to participate in public relations.
- Willingness to participate in relevant focus and cooperation programs of the University.
- Willingness to participate in the self-governance of the University of Natural Resources and Life Sciences, Vienna.
