

Biomass consumed in anthropogenic vegetation fires 2000

This dataset contains data on human induced vegetation fires for 156 countries in the year 2000. It provides data on burnt area as well as burnt biomass for large fires and shifting cultivation fires respectively, as described in the article cited below.

Quote data as: Lauk, C., K.-H. Erb (2009): Biomass consumed in anthropogenic vegetation fires: Global patterns and processes. *Ecological Economics* 69(2), 301-309.
