

Dissertanten und Masterseminar

Department für Chemie – Wintersemester 2018/19

16. Januar 2019, 9:00-12:00 Uhr

Seminarraum Chemie Muthgasse 18, SEM 03/03

9:20 Uhr **David Stenitzer** "Purification and characterisation of beta-galactosidase(s) from gastropods"

9:40 Uhr **Charlotte Olagnon** "Synthesis of donor substrates of 4-amino-4-deoxy-L-arabinose transferases."

10:00 Uhr **Gerhild Wurzer** "Cellulose based materials for protein purification"

10:20 Uhr **Reka Mocsai** "The fascinating world of Chlorella N-glycosylation."

11:00 Uhr **Lorenz Schwaiger** "DyP-Type interaction partners and how to find them."
