

Dissertanten und Masterseminar

Department für Chemie – Sommersemester 2019

Seminarraum Chemie Muthgasse 18, SEM 03/03

29. Mai 2019, 9:00-11:00

9:00 Uhr **Johannes Helm** „ Biochemical characterization of ferrochelatase from *Listeria Monocytogenes*.“

9:20 Uhr **Bernadette Moser** “Online matrix separation/pre-concentration of selected technology critical elements in natural waters by ICP-MS.”

9:40 Uhr **Michael Schober** “Species specific sulfur isotope-amount ratios of sulfur-containing amino acids using HPLC and MC ICP-MS.”

10:00 Uhr **Elisabeth Schaubmayr** “Cellulose-Silica Nanocomposites.”

10:20 Uhr **Julian Selinger** (Aalto Helsinki) "Dry-jet wet spinning of keratin-cellulose fibers."

10:40 Uhr **Arianna Lucia** “Optimization of high-consistency milling and oxidation of cellulose.”
