

DIBB RESEARCH SYMPOSIUM 2020

Thursday, March 26, 2020; 9:00
Festsaal (MENH-03/01)

09:00 – 09:05	Welcome by the department head: Klaus HACKLÄNDER (DIBB)
09:05 – 09:35	Lukas LANDLER (ZOO) Animal orientation and its role in spatial ecology
09:35 – 10:05	Sophie KRATSCHMER (ZOO) Impact of vineyard management on taxonomic and functional diversity of plants and wild bees in Austria and South Africa
10:05 – 10:35 Coffee break	
10:35 – 11:25	Frederik SACHSER (IWJ) Hierarchical models (HM) in population ecology. Application of a N-mixture model using time-for-space substitution to estimate small mammal abundance in Rothwald, Dürrenstein Wilderness Area, Lower Austria between 2006-2019
11:25 – 11:55	Barbara TURNER (BOT) Genetic characterisation of cattail (Typha) species
11:55 – 12:25	Tadeja SAVI (BOT) Effects of coupled drought and biotic stresses on plant physiology: a case study on Vitis plants
12:25 – 14:00 Lunch (cold buffet) + networking	

No registration required!
