

**Die weitere Entwicklung der Brutkolonien von Graupelikanen und Asiatischen Nimmersatten in der Umgebung des Khao Khieo Open Zoos (Thailand). [Further development of the rookeries of Spot-billed pelicanes (*Pelecanus philippensis*) and Painted storks (*Mycteria leucocephala*) in the Khao Khieo Open Zoo (Thailand)].**

The further development of breeding colonies of Spot-billed pelicanes (*Pelecanus philippensis*) and Painted storks (*Mycteria leucocephala*) in the Khao Khieo Open Zoo and its surroundings is reported. Since the years 1990 and 1991 respectively, the populations of both species increased to nearly 200 birds in 1995.
