

Two new species of Meconematinae (Ensifera: Tettigoniidae) from Thailand

KARL SÄNGER & BRIGITTE HELFERT

Abstract

Two new species of Meconematinae (*Kuzicus aspercaudatus* sp. n. and *Xizicus kaltenbachi* sp. n.) are described and diagnosed. Furthermore, parasitism by a Nemestrinidae (Diptera), probably *Atriadops* sp., in a Meconematinae is proved for the first time.

Key words: Meconematinae, taxonomy, *Kuzicus*, *Xizicus*, new species, Nemestrinidae, Thailand.
