Pia Kuusiniemi & Krista Muurinen
LOCI Landscape Architects Ltd.

The Office was founded in 2005 and was based on the cooperation of five recently graduated young female landscape architects: Milla Hakari, Pia Kuusiniemi, Krista Muurinen, Teresa Rönkä and Emilia Weckman.

The teamwork between them began already during their studies. In seven years they have become one of the biggest landscape architect owned offices in Finland. They also take part in the development of the profession in several ways, partners run courses and give lectures at the Aalto University, participate actively in associations related to the profession and work in interaction with other design related professions.
