Text and Summary: in englischer Sprache / in English language

This Core document is one if the main outcomes of the work within the COST Action E34. It summarizes in comprehensive form the actual state as well as development needs and work ongoing reflecting the work done within the scope of the three Working Groups:

- bonding of timber at the site in repairing wooden constructions
- bonding of green/wet wood to overcome the mentioned problems of moisture content induced changes in shape and
- various principles of the bonding process of timber and wood on a basic and partly theoretical level.

This Core Document shall serve as a platform for building scientific cooperation and partnership across Europe and will support "Europe" to speak with one single voice throughout COST Actions like E34.
