

# Wood as a Bio-Inspiring Material

# Stefanie Tschegg\*, Thomas Rosenau\*\*, Antje Potthast\*\* and Falk Liebner\*\*

University of Natural Resources and Applied Life Sciences, BOKU, Vienna

\*Institute of Physics and Materials Science \*\* Institute of Chemistry

COST Strategic Workshop "Principles and Development of Bio-Inspired Materials", BOKU Vienna, April 13-15, 2010

IPM

Wood – Complex hierarchical structure Layered and cellular composite

Layers: Annual rings, cell walls

Al-alloy – Epoxi layers – Aramid / Glass reinforcing fibres

Schematic of ARALL Laminate

S. Tschegg, COST Strategic Workshop "Principles and Development of Bio-Inspired Materials" 3 BOKU, April 13-15, 2010

# **Cellular** composites

#### Wood – cells: Hollow tubes Low density AND High stiffness

Beech microstructure Differing cell sizes Wood rays perpendicular to longitudinal tracheids Fatigue fracture:  $\varepsilon = 2.5 \times 10^{-3}$ , N<sub>f</sub> = 1.24x10<sup>7</sup> Metallic foams – open and closed cells - low weight....

S. Tschegg, COST Strategic Workshop "Principles and Development of Bio-Inspired Materials" 4 BOKU, April 13-15, 2010

# Orientation and angle of fibres

# Fracture tolerance – high fracture resistance Non- LEFM

S. Tschegg, COST Strategic Workshop "Principles and Development of Bio-Inspired Materials" BOKU, April 13-15, 2010

# **Further Improvement** Compression Wood

IPM

S. Tschegg, COST Strategic Workshop "Principles and Development of Bio-Inspired Materials" BOKU, April 13-15, 2010 8

# **Change of Fracture Mode - Yew Compression Wood**

**High load:** •Ray fracture - brittle

S. Tschegg, COST Strategic Workshop "Principles and Development of Bio-Inspired Materials" BOKU, April 13-15, 2010

# Fibre Bridging in Yew Compression Wood

Keunecke et al. 2007

S. Tschegg, COST Strategic Workshop "Principles and Development of Bio-Inspired Materials" BOKU, April 13-15, 2010

10

### Summary: Fracture Tolerance by Shapes and Dimensions of Structure Several Mechanisms of Crack Arrest

#### **Elongated fibres**

reinforcing braching, bridging Layers

## Cells and holes

crack stoppers

#### Several mechanisms $\rightarrow$ fracture tolerant

IPM
