1. Biology and role of the mitogenome

Mitogenome

- small circular molecule (mtDNA \approx 16,472 bp : nDNA \approx 3*10⁹ bp)
- coding of 37 genes (13 of 87 OXPHOS components → cell energy)

2. Mitogenome determination

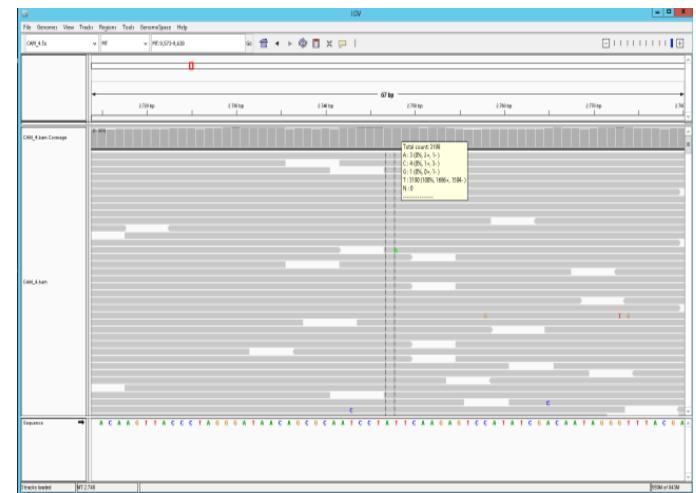

Sanger sequencing

- Approximately >20 sequences

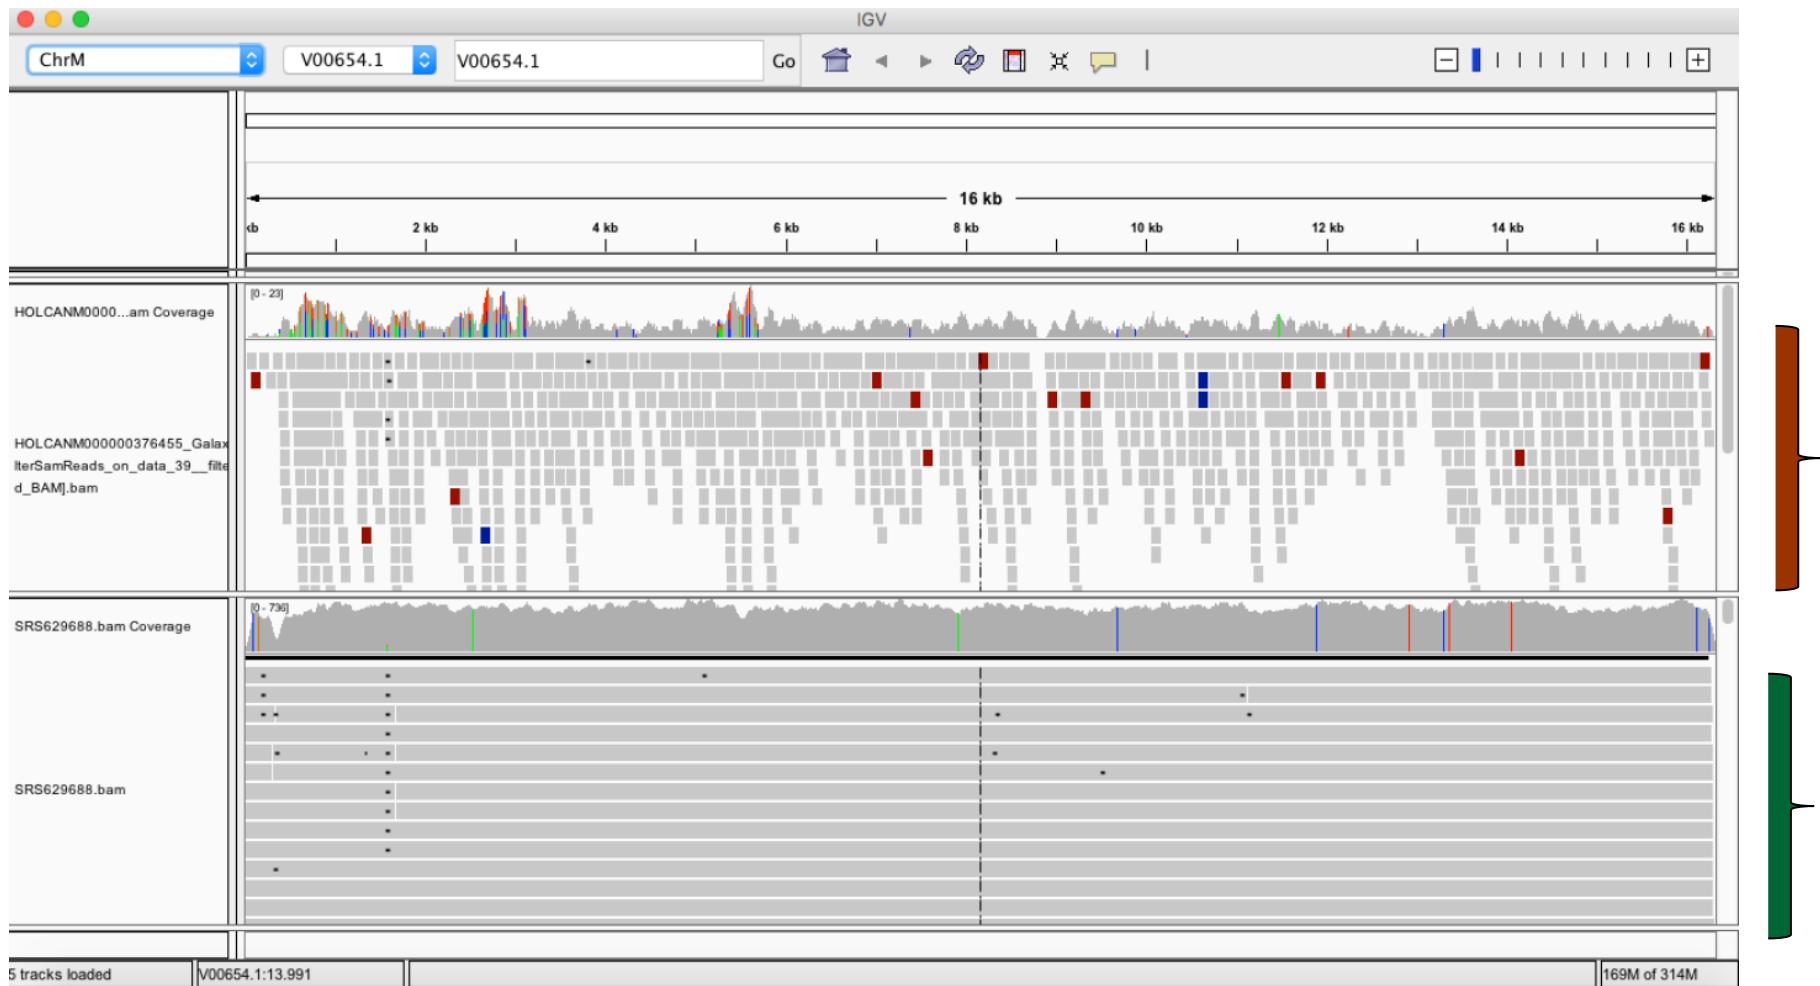

NGS sequencing

- Sequencing after long range PCRs
- Retrieval from WGS

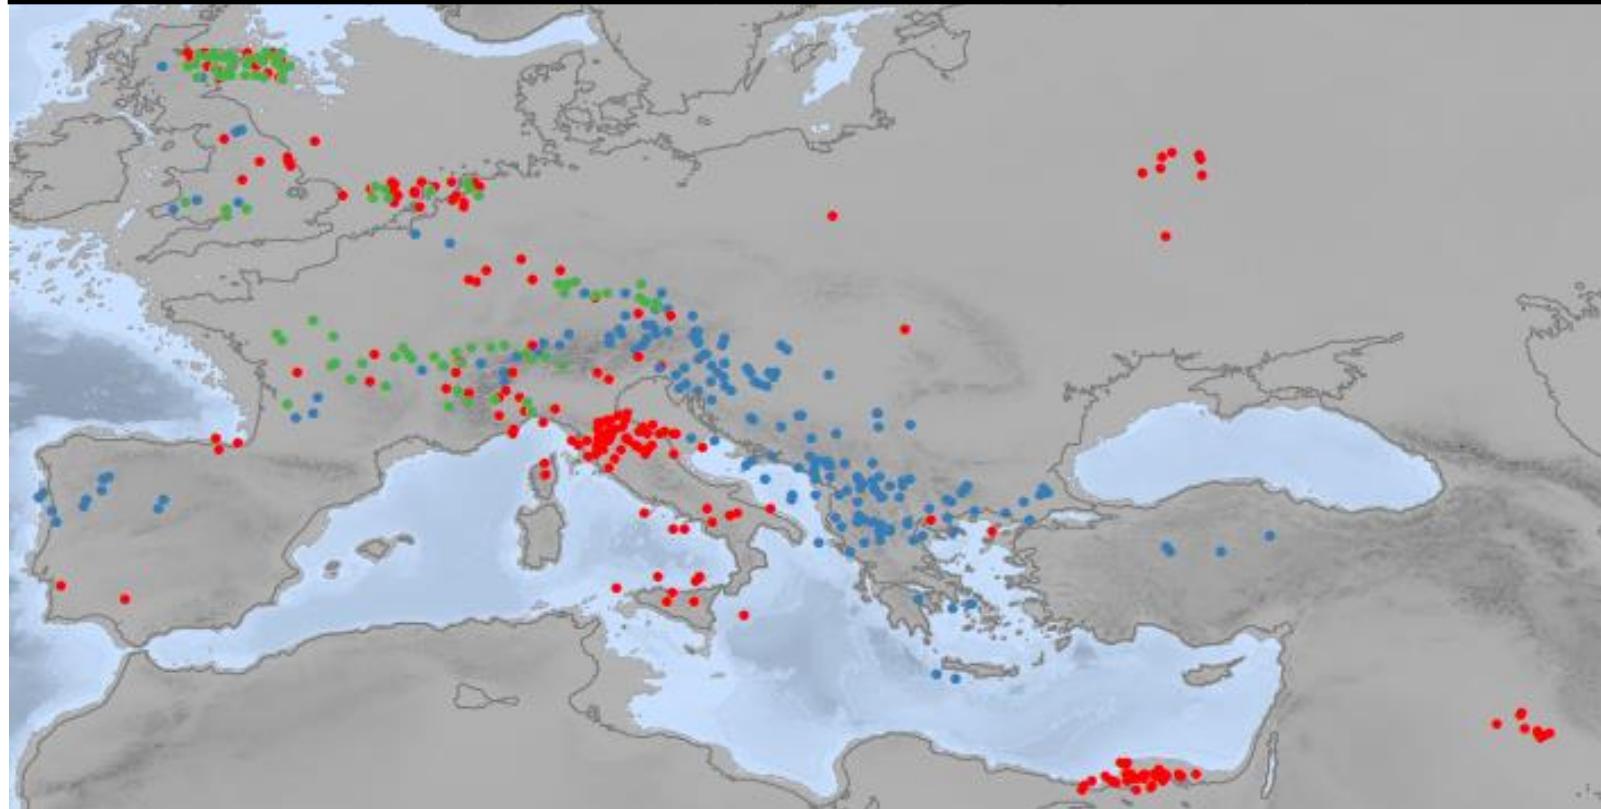

NGS → IGV
