AG Transdisziplinäre Systemforschung**

Topic	Re-setting crop rotation and forage strategy in an organic farm (350ha) in Vietnam
Goal	Optimizing organic farm in Vietnam
Description	The discussed farm is currently driven by a crop follow up of maize and gras both used as forage. This follow up doesnt fulfil organic approaches, and needs a fundamental revision.
Methods	Farm analysis, farm planning including crop rotatation nutrient balance, humus balance, forage balance, economy etc.
Region	Tropics (North Vietnam)
Emphasis	Natural Science
Time plan	From now on
Supervisor	Bernhard Freyer
Pre-requisites	Thesis is to write in English
