

The Centre for Development Research

An attempt to strengthen scientific collaboration
across disciplines and stakeholders

It's science.

Knowledge that makes a difference

“The crisis behind the crises
is what we must tackle.”

Olivier de Schutter:
“We produce food and hunger
at the same time.”

1

“Making a difference means
overcoming current patterns”

1. “Same, but different intensity”
2. “We know”
3. “Blame the others”
4. “New jargon”
5. **“Focus on the obvious”**

2

“Overcoming current patterns
calls for alternatives”

1. What science can do
2. Good news: there are good news
3. What to learn from Beatrice and Dorothy
4. Seeking opportunities
5. Enhancing innovation

3

“Thinking in alternatives is a core business of universities”

1. Contribute insights
2. Mainstream off-streams
3. Bridge gaps
4. Believe in different things
5. We in five years

“The crisis behind the crises
is what we must tackle.”
