

5th International Scientific Conference **FORTECHENVI 2019**

 Faculty
of Forestry
and Wood
Technology

9–12 September 2019 | Brno | Czech Republic

Mendel University in Brno | Faculty of Forestry and Wood Technology | Department of Engineering

The fifth international scientific conference FORTECHENVI 2019 is organized on the occasion of celebrating the 100th anniversary of the establishment of Mendel University in Brno.

The Conference will be focused on the following areas: forest machinery and technologies, timber logging, haulage and forest regeneration with the emphasis on the current needs of forest management – the processing of salvage felling timber and subsequent reforestation, small-scale production technologies in forestry, precision forestry, ecological impacts of the operation of forest machines and their minimization, non-wood forest products, ergonomics and labour safety, use of logging residues for energy, management of woody areas growing outside the forest, teaching technical subjects at forestry faculties and their collaboration with the professional forestry field etc.

The conference is intended for teachers, scientists and researchers as well as for professional forestry field staff.
