Innovation in Teaching & Learning

The **EPICUR*talks*** series explores the advancement in teaching & learning, including Liberal Arts and Sciences approaches as well as developments of new tools and didactics in digital and hybrid settings. The EPICUR*talks* will highlight the innovative teaching & learning projects at the EPICUR alliance and its eight partner universities. Hosted by the **University of Freiburg**, the series will travel virtually from partner to partner, inviting speakers from across the disciplinary spectrum to share their diverse perspectives on the future of teaching & learning in brief talks that inspire and invite further discussion.

EPICUR *talks*

The EPICUR Alliance cordially invites you to its fourth virtual EPICUR*talk* and discussion on **May, 04th, 2021** at **5:30 pm CET**

L2D2
Teaching and Learning under the Conditions of Digitization and Digitality

with

David Lohner

Center for Technology-Enhanced Learning
Karlsruhe Institute for Technology (KIT)

"The idea that is being pursued with L2D2 challenges and encourages students and lecturers alike to deal productively with the question of how digitality changes teaching and learning"
Sarah Stumpf, L2D2

Beyond replacing books and papers with computers, the process of digitalization has created a new culture of digitality which deeply affects the way teaching and learning is organized and structured. In his talk, David Lohner will address the outcomes and experiences of the L2D2-Project that is connecting five universities in Germany, holding a digital joint inter-university seminar on the subject of "Teaching and Learning under the Conditions of Digitization and Digitality". The seminar is built around the four key competences of learning in the twenty-first century: communication, collaboration, creativity and critical thinking. The group of lecturers, which met through Twitter based their seminar on two major questions: What does the culture of digitality mean for students and educators? What defines quality teaching under the condition of digitalization and digitality? Offering an opportunity for both students and educators to learn and grow professionally, David Lohner will share some of the key lessons of this award-winning seminar.

The EPICUR*talks* lecture will be followed by a discussion with **Dorthe Hutz-Nierhoff, E-Learning Department**, University of Freiburg. Please RSVP to: k.kiefel@zv.uni-freiburg.de by **May, 3rd.** Attendees will receive their zoom link on May, 4th. The event will take approximately an hour.
