### We work together for a sustainable future

GCUA 2030 is a global network with members from all over the world. The possibilities to share knowledge and learn from each other are endless. So in spite of challenges related to the on-going pandemic and a world upside down in many ways, we are happy to see a lot of activities going on within the network. A number of interesting courses, webinars and other activities have been conducted over the last months. We have also expanded and strengthened our network and developed plans for a number of interesting and exciting activities for the coming years!

### Call for Abstract - Agri4D

The digital Agri4D 2021 conference "Food systems for new realities" is now open for abstract submission. This year, focus is on how we can shape sustainable and just food systems that are resilient to new realities. You are welcome to submit your abstract until 31 May 2021.

## Food system summit

During 2021, the world makes a joint effort to discuss and plan for sustainable food systems. In September, the UN conference Food Systems Summit will be held in New York. Sweden, as well as many other countries, will arrange dialogues on Food Systems. SLU actively participates with research and knowledge about Food Systems and you are welcome to join!

## GCUA 2030 award

GCUA 2030 is proud to announce the GCUA 2030 award. The award is established to encourage high quality research of relevance for sustainable global development. Each member university can nominate up to three candidates for the prize. Eligible candidates are PhD students or those who defended their thesis in 2020 at one of the GCUA 2030 member universities.

Welcome with your nominations!

## Presentation: Thesis of the year 2019

Welcome to the Thesis of the Year 2019 presentation by the winner Maria Elisa Quinteros Caceres from University of Chile. She will present her work on how to improve health care for pregnant women and infants in Chile. The event will be held online on May 26.

## Let's meet Penn State Uni!

Penn State University in the U.S. is one of the newest members of GCUA 2030. It is a university located in State College in Pennsylvania. Ruth Mendum is one of the coordinators and represents Penn State University in the GCUA 2030 network.

## Webinar: How to conduct a systematic review?

For you who missed the webinar on how to conduct a systematic review, the event was recorded and you will find it on the GCUA 2030 website as well as here.
