UNIVERSITIES IN TRANSITION:

Inspiring Strategies for Sustainable Campuses

Language: English

The initiative will take in analysis the evolving role of environmental sustainability in European universities, exploring **how institutions embed it into their infrastructure, operations and governance models.**

Technical and administrative staff are key to turning sustainability strategies into action. By connecting across Europe, they share challenges and solutions that drive the green transition in Higher Education. Promoted topics for peer learning include:

- Sustainable mobility strategies
- Mitigation and adaptation strategies
- Campus energy management
- Circular economy practices
- Environmental certifications
- Behavioural change and environmental sustainability communication

Open to technical and administrative staff:

- passionate about creating a positive impact
- open to learning and collaboration
- ready to integrate environmental sustainability into university operations and drive institutional change
