

**BOKU saves energy**

**Thank you for taking part!**

**Energy Check Lecture Hall/seminar room/meetingroom**

### Save heat

- Set heating to level 2-3
- Level 4 increases consumption by 30 %.
- Stage 1.5 after the last LVA or meeting
- Adapt clothing to the season
- 3-4 min shock ventilation instead of continuous ventilation or tilted windows
- Keep doors closed

**Save up to 10 %**

### Optimize laptop operation

- Reduce screen brightness
- Turn stand-by mode or off when not in use
- Camera off in video conferences if not necessary
- Use wired devices instead of Bluetooth
- Use advanced power saving settings and dark mode
- Files via BOKUdrive instead of e-mail attachments
- Bookmark websites (1.4g CO<sub>2</sub> per Google request)

### Save power

- Lighting only where/when necessary
- Climb stairs instead of taking elevators
- Switch off beamers, monitors and lighting before leaving the building

**Save up to 5 %**
