

BOKU saves energy

How can I save energy for refrigeration?

Space-saving cooling:
Shared use of refrigerators and freezers & regular tidying up!

Adjust the temperature level:
Switching from -80°C to -70°C saves around **24%** energy!

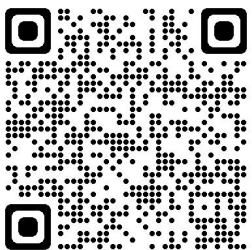

Check the door seals:
Ice formation may be related to leaks!

Switch off devices that are not needed.

Keep door seals and cooling surfaces **free of ice.**
