

Please report problems with heating, ventilation, doors and windows here.

More info about our energy-saving campaign

Tips for the cooling season

- Ventilate in the morning when outside temperatures are low
- Cross ventilation at high outside temperatures (no tilted windows)
- Use table fans
- Use window shading
- Reduce internal heat loads (e.g. set PC to energy-saving mode)

Save up to 10%

Tips for the heating season

- Keep the doors closed
- Ventilate for 3-4 min. rather than continuously (no tilted windows)
- Adapt clothing to the season
- Keep radiators free
- Level 2 after work, before homeoffice or public holidays
- Set heating to level 3 as level 4 increases consumption by 24%
