

### **Internship in Natural Science**

**Periodo:** November 2018 **Durata:** 2 month (extendable period)

Università Popolare Anidra is a University that has the total education of the human being at the center of its project: mind, body, emotions, and relationships. It is a holistic center and a farm, and it offers the possibility for trainee students to gain practical experience of the life of a village / accommodation surrounded by nature, with the ability to follow their attitudes and express their skills to the best, also facing difficulties and improving points weak.

In particular, natural science students will be able to do personal research in their own field and acquire the eight transversal competences of European citizenship.

The trainees will be included in the Anidra project and will also experience physical and manual work as an adjunct to formal learning, this kind of cross-cutting knowledge is useful to the curricular baggage of all professionals.

The training activities will take place at the Anidagri srl Agricultural Company ([www.anidagri.it](http://www.anidagri.it)) and will be as follows:

- Biological agriculture
- Composting
- Permaculture, Fukuoka
- Small green building structures

The work carried out will be monitored and evaluated constantly by our tutors.
